

Job Posting Water & Wastewater Division

POSITION: **Application Engineer**
REPORTS TO: **Application Engineering Supervisor**
LOCATION: **Richmond, Virginia**
 USA

We are seeking an ambitious, exceptionally well-organized, and detail-oriented person with a winning attitude. The applicant must be able to multi-task with various departments within the KSB organization and distribution network. Must be able to work in an exciting and fast paced environment.

DUTIES AND RESPONSIBILITIES: *Under moderate supervision*

- Technical review of municipal water and wastewater specifications and drawings (pump/mixer equipment and associated drives, speed control devices, controls, etc.)
- Preparation of proposals and technical submittals
- Request pricing quotations and technical data for buy-out equipment (i.e. electric motors, line-shafts, couplings, etc.)
- Clarifying technical and commercial issues with customers
- Support sales team (Regional Managers and distribution network), liaison with KSB Factories, suppliers and customers in the evaluation of KSB proposals.
- Preparing CAD drawings for submittals to customers
- Engineering support to our distribution network, customers and KSB personnel during quotation, submittal and contract project phases.
- Occasional travel may be required
- Team work spirit and individual initiative

EDUCATION/EXPERIENCE:

B.S. degree in Engineering or equivalent, with two to five years of engineering experience, preferably in the wastewater field. Experience with AutoCAD and Microsoft Office is required.

Not required but a definite plus:

- Experience with rotating equipment or municipal water treatment equipment
- Experience reviewing or writing municipal specifications

Interested candidates should send resume, cover letter and salary requirements to:
careers@ksbusa.com or Fax Resume to 804-226-6961
